

LEON

AUTUMN 2016

PROTECTING YOUR MOST VALUABLE ASSET

Considering all the criteria involved, the LEON line has evolved and changed to offer capacities which maximize both precision and productivity, while keeping overall servicing, tractor fuel consumption, and potential downtime to a minimum. Higher horsepower track and wheeled agricultural tractors are more powerful and efficient than ever when pulling LEON Land Scrapers. Increased traction and floatation has never been better when working in wet farmland and dirt. Certain farmland and soils (wet clay, hardpack, etc.) can present challenges to the operator. The LEON 'Straight Hitch' Series is here to offer four models for tractors in the 150 to 500 HP range. When used in the right applications, the LEON Straight Hitch Line can assist in transferring **up to 30% of its scraper weight** to the tractor drawbar in order to fully maximize down pressure onto the cutting edge.

Land reclamation and development projects continue to be an important priority for farmers every season. Every property owner has their unique needs as to how they want to maximize the most from their land. LEON is listening to you and has continually expanded its line of Hydraulic Forced Ejection Land Scrapers and Fully Hydraulic 8 Way Pull Scrapers to offer dealers and farm operators a complete range of units designed to fit every horsepower need.

When visiting with past and future customers at local 2016 trade fairs, dealer open houses, and LEON Product Demonstration Days, farm operators point out these popular applications for LEON Earthmoving equipment:

- ⇒ **Agricultural & Construction Projects**
- ⇒ **Building Dugouts**
- ⇒ **Environmental Projects**
- ⇒ **Land Reclamation**
- ⇒ **Landscaping & Irrigation**
- ⇒ **Livestock Water Relocation**
- ⇒ **Protecting Shorelines**
- ⇒ **Rebuilding New Fence Lines**
- ⇒ **Rebuilding Roadways**
- ⇒ **Reducing Soil Erosion**
- ⇒ **Etc.**

The 2016 LEON Land Scraper line features models in the 6.5 to 20.5 cubic yard capacity in both dolly and straight hitch designs. Units can also be pulled in tandem to 'double up' load capacities. Complimenting them is an expanded list of options and accessories to help operators get the most out of their investment. GPS / laser equipment, push bumper bars, side extensions, bigger floatation tires, and special hitch configurations are just a few of the accessories available. LEON sales and engineering personnel are constantly in contact with equipment operators and dealers gaining more insight into what performance features and innovations will help them increase productivity in the field. When making a sizable equipment investment, we understand that nothing short of optimal performance will do. Most informed operators have important land scraper questions that must be answered before determining which LEON unit will best suit their needs. Decision makers need to determine:

- ⇒ **Which LEON unit can best penetrate your land's soil conditions?**
- ⇒ **Does your tractor horsepower match your LEON Land Scraper capacity requirements?**

Larger LEON Land Scrapers can also be equipped with Large Floatation 23 1/2 x 25 Super Grip Tires to aggressively guide the unit through the most challenging terrain. The extra width and superior tire height of LEON tire options are a noticeable advantage over other multi tire scrapers due to their **superior climbing performance** on both wet and soft farmland.

In addition to the Land Scraper Series, LEON also offers the **Pull Scraper GZ line-up**. LEON Model GZ325, GZ425 and GZ625 are available with blade widths ranging from 8 feet to 22 feet. These **8-way fully hydraulic** pull scrapers have load capacities of 2.1 to 17.5 cubic yards. LEON Pull Scrapers are an **All Year Round Must** on every farm and are ideal for numerous applications.

Contact the factory or your local dealer for complete details on the right LEON Land Scraper Package to meet your specific needs. **Check out NEW LEON Land Scraper and Pull Scraper videos at www.LEONSMFG.com.**

LEON Land Scrapers are available in 6.5 to 41.0 cubic yard capacities (Tandem Series).

Give your land the makeover it deserves with LEON Pull Scrapers.

LEON PERFORMANCE COMMITMENT

LEON LONG LIFE PROTECTION

All LEON Land Scraper technology features reversible and replaceable cutting edges, high wear scraper tires, and heavy duty hubs and spindles. Long life industrial built RAM cylinders and hydraulics have fueled the LEON LAND SCRAPER line for over 40 years and counting. Our trouble free warranties and dealer support keep you working in the field season after season.

LEON PRODUCTIVITY

Scientifically designed, the powerful cutting edge action and responsive hydraulic system makes the large capacity carrying buckets easy to load. Make fewer passes, and reduce overall tractor horsepower and fuel requirements with dependability and performance you can trust.

LEON LASER PRECISION

Utilize LEON Laser Guided Systems with full synchronized scraper 'hydraulic control' for faster, more precise grading and spreading.

LEON VERSATILITY

Only LEON provides Dolly Wheel and Straight Hitch Models in single unit capacities ranging from 6.5 to 20.5 yards, plus multiple tandem unit options (up to 41 cubic yards)!

M 2050	✓	✓	20.37 cu.yd. (15.55 cu.m)	✓	✓

WHAT LEON LAND SCRAPER IS RIGHT FOR YOU?

DOLLY WHEEL SERIES

- ⇒ Finer cut with cutting edge and more precise turning control
- ⇒ LEON Ball Steering provides tighter turning radius
- ⇒ Can transport behind a pickup truck
- ⇒ Machine weight evenly dispersed on tires
- ⇒ Capacities from 6.5 to 41.0 yards (Tandem Series)

LEON Land Scraper Model 1000 Dolly Wheel

LEON Land Scraper Model 1000 Straight Hitch

STRAIGHT HITCH SERIES

- ⇒ More aggressive cut with the cutting edge, with 30% more down pressure on the front hitch
- ⇒ Unobstructed view of the scraper cutting edge from tractor cab
- ⇒ Works well in heavy, hard packed clay
- ⇒ Customized hitch packages for individual tractor
- ⇒ Capacities from 6.5 to 41.0 yards (Tandem Series)

NEED FINANCING?

FCC (Canada), National Leasing (Canada) and Wells Fargo (USA) can help!

Visit www.LEONSMFG.com to download an application. Click on the Customer Support menu tab and select Financing and Leasing. Low interest, Flexible terms are available.

GZ425 PULL SCRAPER

The LEON GZ425 Pull Scraper is a year round must on every farm for landscaping, road grading, irrigation, ditch work, clearing brush, rock digging, leveling fields, cleaning feed lots, snow removal, road development and numerous other uses. The GZ425 offers '8-way' Blade Adjustment which consists of lifting and lowering and left and right angling, tilting and offsetting. Standard offsetting allows the boom to offset 10 feet either left of right.

CUSTOM COLOR OPTIONS

Custom Colour packages are available on all LEON **CASE** Red, **JOHN DEERE** Green, **NEW HOLLAND** Blue, **CAT** Yellow, standard LEON Black and MUCH MORE. Ask your LEON Dealer about Colour Options and find the color that best suits your tractor. All LEON products are painted using superior 'Baked-on Powder Coated' paint.

LEON GZ300 Pull Scraper - Custom NEW HOLLAND Blue

NEW GZ625 PULL SCRAPER

The LEON GZ625 ALL SEASON '8 WAY' PULL SCRAPER is built heavier and stronger to handle heavy duty agricultural and industrial tasks on farm, construction sites, and municipal applications. This unit is rated for up to 625++ tractor horsepower to tackle applications that are difficult and demand more power and handling capacity. Optional hitches, side plates, and weight packages available.

HYDRA PUSH SPREADERS - OVER 2 DECADES SERVING YOU

LEON Hydra Push Spreaders are the best-selling spreader in the industry and for good reason. LEON offers an industrial built unit with modern technology and features to ensure superior quality and performance. Its **Hydraulic Push Off** technology eliminates chains, sprockets, and motors. The **Hydraulic End Gate** is hydraulically controlled and snugly fitted to help contain loose and semi-liquid material. UHMW Polyethylene Guides ensure the support and alignment of moving parts through the entire cycle. LEON's unique Beater Assembly allows to easily convert the Spreader into a durable **Trailer**. The **solid poly box** is constructed from super slippery solid poly materials that are environmentally friendly and corrosion proof.

Triple Lip Sealed Bearings with Eccentric Locking Collars are used for drive shafts for all models and 4"x4" high grade lumber protects the top of spreader frame when loading material. LEON's Spreader utilizes high and wide commercial truck tires as standard equipment. Beaters are balanced and synchronized to deliver a wider and consistent spread pattern. The operator also has quick access to all components for easy serviceability.

With Horizontal and Vertical Beater models ranging from 425 to 900++ heaped bushels, LEON Hydra Push Spreaders are your hard working reliable partner in the field.
