### ***NEW LEON RAMROD SASK TRADE SHOW***

LEON Mfg. Company is excited to announce it's participation in the first ever Ag in Motion—Western Canada's Outdoor Farm Show.

Ag in Motion is hosted by the company that organizes the Outdoor Farm Show in Woodstock, Ontario, the largest outdoor farm show in Canada. Now the same team is bringing their agricultural knowledge to Saskatchewan and hosting Western Canada's only outdoor farm show.

Held on July 21-23, 2015, the show is positioned on 320 acres of farm land, which is located 15 minutes from Saskatoon. Along with over 150 exhibitors, LEON plans to showcase the entire 2015 LEON product line-up in the display booth, including Bale Handlers, Dozer Blades, Land Scrapers, Manure Spreaders, Pull Scrapers, Rear Blades, and RAMROD Mini Skid Loaders.

Something that LEON is looking forward to is utilizing a large demo area. This 150 x 300 feet booth allows ample space for demonstrating LEON products, as well as allows users a first hand chance to operate a RAMROD Mini Skid Loader and several attachments. ■

**LEON Dozer Blades and LEON Land Scraper working with Versatile Tractors**

LEON is celebrating 6 decades mounting the quality Versatile Tractor line with its full line of 2WD and 4WD Dozer Blade Units. Although the model numbers and colors have changed over the years, the tradition of **HEAVY DUTY LEON PERFORMANCE** on the full range of Versatile 4WD and DeltaTrack Series up to 500 horsepower ++ continues to help farmers maximize productivity in the field around the globe.

For 2015-2016 LEON has delivered and mounted its Quick On Quick Off Model 4000 and Model 5000 Series for countless Versatile Models including the Model 305-575 4WD Series, the newer 450-550 4WD Tier 4 Series, and the trending 450-550 DeltaTrack Tier 4 Series. Only LEON provides higher blade height capabilities, maximum underframe clearance, full tractor serviceability, and the LEON Exclusive Quick On Quick Mount Frame system that farmers demand. **(Continued next page...)**

## LEON GZ400 - A YEAR ROUND MUST!

Dan and Frances Cloutier, are proud owners of a LEON GZ400 Pull Scraper. Pulling their scraper is a 2WD dual wheeled tractor with 190 Horsepower. They work a total of 6500 acres with Dan adding, "So far the pull blade has seen every field they work". The Cloutier's have owned their scraper for over 2 years now and have used it mainly during the Fall and Winter seasons. They have had no trouble finding different projects to utilize their pull scraper, including fixing/digging ditches, back sloping fields, levelling gravel and dirt around building and on driveways, and removing snow from ditches to prevent possible flooding.

The Cloutier brothers have discovered a unique project of cutting the roots from the field by angling the LEON Pull Scraper and digging a 10" ditch effectively stopping the encroaching roots from reaching the field. Roots from surrounding bush/tree lines can grow 20 feet or more into fields causing problems with the crops by stealing water and fertilizer. They discovered this trick while they were digging shallow trenches to divert water from the bush line away from their fields.

**"My favourite feature is the steering axle. I like that the blade can offset at varying distances. Whether its 2 feet or 10 feet, it adjusts depending on what you need." Says Dan.**

Dan also added "Absolutely I would recommend this scraper to any farmer, or anyone that has to do work in their fields. In my opinion , it should be a standard piece of equipment on all farms."

## LATEST VERSATILE DOZER MOUNTS

# LEON 2015 TOP PERFORMERS

**LEON TOP PERFORMING DEALERS** are equipment and service outlets that go above and beyond for their customers. Outstanding customer service, proactive technical and parts support, and timely AFTER sale follow up is what makes those LEON dealers GREAT! Check out these dealer profiles of LEON DEALERS who go the extra mile for their customers.

## *E. Bourassa & Sons - Assiniboia, Saskatchewan*

"E. Bourassa & Sons have lots of reasons to be proud of their business. Their long history of serving local communities is chief among these. With a history of 88 years (and counting), E. Bourassa &

Sons have an award winning track record of putting customers first. It's been that way from the very beginning.

Today, E. Bourassa & Sons continues to grow under the strong leadership and direction of the fourth generation of the Bourassa family. Lots of things have changed, but core values remain the same - quality customer service, backed by honesty and fairness are the keys to their success.

Since 1924, the customer-driven values of the company have always set them apart from the competition. Today, each member of the team in every one of their five locations continue to be dedicated to ensuring that customers receive the best in both product and service.

E. Bourassa & Sons .... partnering with producers for generations."

## *Trochu Motors - Trochu, Alberta*

"Trochu Motors has been committed to the goals of central Alberta's farmers for more than six decades. Since 1947, they have strived to provide an exceptional level of customer service and technical.

Trochu Motors was established in 1947 when brothers John and Aaron Stankievich purchased Adams Motors and renamed it Trochu Motors. Jack Stankievich, John's son, took over management in 1977 and began to exclusively focus on the agricultural side of the dealership. The Ford franchise was dropped in favour of White Farm Equipment and in the early 1980s they acquired the Massey Ferguson franchise. Eventually both Massey Ferguson and White were purchased by AGCO and became an AGCO dealership in 1990.

Trochu Motors had about 6 full time employees and two product lines in 1950 and today they have about 40 employees and close to 15 product lines."

Company Profile provided [www.trochumotors.com](http://www.trochumotors.com)

**LEON wants to thank Rich, Jack and the entire Sales & Service staff for their outstanding sales and product support. Trochu Motors proudly handles the AGCO and Versatile Product Lines. Trochu Motors is a Top 2015 LEON Performer specializing in sales of LEON Dozer Blade Units, LEON Land Scrapers, and LEON Pull Scrapers.**

### LEON 'PUSHES' THROUGH IOWA

Mark Murfeld from Murfeld Transport Inc. recently purchased a 18 foot LEON Dozer Blade for his 9360R John Deere 4WD tractor.

Mark uses his blade mainly during the long winter seasons in Iowa to push snow, and large amounts of it. Mark comments,

**"When the LEON Dozer Blade starts pushing, it PUSHES!"**

Mark uses his dozer blades primarily to remove snow from hog containment buildings and clear roads leading to buildings so workers can safely get to them. He also clears snow from large parking lots at malls, schools, hospitals, and much more.

We first meet Mark at the National Farm Machinery Show in Kentucky and since day one has appreciated how we dealt directly with farmers and contractors, as well as through a large dealer base. He also took advantage of our LEON Dozer Blade install program and had only good things to say about our LEON technician.

"Gary (LEON Technician) was a very nice and professional young man. He knew what he was doing and with the help of my men we turned a three day project into a one. He stuck around until the entire job was done and made absolutely sure everything was working 100 percent before leaving. It would have been much harder without Gary."

## NEW 2015 DOZER MOUNTS KITS

LEON is committed to developing the very latest in dozer blade mounts for top selling tractors. Whether your needs are for snow clearing, earth moving, or silage applications LEON has you covered.
